

LEVELUK SUPER501 DEEP CLEANING MANUAL

1) Turn off the machine

2) Remove cover

3) Remove the filter

4) Take out CPU

5) Place the CPU in the machine where the filter was.

6) Prepare 1 container

7) Prepare 1 glass citric acid

8) Prepare 1 glass hot water

9) Pour 1 glass citric acid onto the container

10) Pour 1 glass hot water onto the container

11) Dissolve the solution

12) Add 1 liter tap water onto the container.

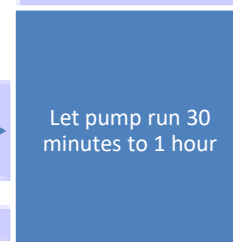

13) Connect white hose with pump hose. (**You must connect from the bottom**)

14) Place pump and acidic hose (grey hose) into the container.

15) Power on the pump

16) Let pump running for 30 minutes to 1 hour

17) Power off the pump.

18) Disconnect white hose from pump hose.

19) Connect white hose to tap water. Then rinse the machine by running water for 5 minutes

*** For SUPER501 got TWO CHAMBER, we have to run deep cleaning for both chamber
*** Repeat step 9 until step 19 for one more hose

21) Remove the CPU

22) Install filter back in

23) Put your cover back in.

Finish

NOTES:

Even when you do e-cleanings regularly, you will still need to have a deep cleaning done at least once a year. This will ensure maximum effectiveness and yield the best results for your Kangen Water®.
