

# LEVELUK K8 DEEP CLEANING MANUAL

1) Turn off the machine

2) Remove cover

3) Remove the filter

4) Take out **Cleaning Cap** for K8

5) Place the **Cleaning Cap** in the machine where the filter was.

6) Prepare 1 container

7) Prepare 1 glass citric acid (300gram)

8) Prepare 1 glass hot water

9) Pour 1 glass citric acid onto the container

10) Pour 1 glass hot water onto the container

11) Dissolve the solution

12) Add 1 liter tap water onto the container.

13) Place pump and acidic hose (grey hose) into the container.

14) Power on the pump.

Let pump run  
30 minutes  
to 1 hour

15) Let pump running for 30 minutes to 1 hour

16) Power off the pump.

17) Disconnect white hose from pump hose.

18) Connect white hose to tap water. Then rinse the machine by running water for 5 minutes

19) Remove the **Cleaning Cap**

20) Put your filter back in (When storing your Cleaning Cap don't store it wet with the lid on, allow it to completely dry.)

21) Put your cover back in.

Finish

## NOTES:

Even when you do e-cleanings regularly, you will still need to have a deep cleaning done at least once a year. This will ensure maximum effectiveness and yield the best results for your Kangen Water®.

The optimum pump pressure range between 16 ~ 21liter/minutes.
